

Contents of issue 3-4 vol. XLVII

- 221 K.J. KALIŃSKI and T. KUCHARSKI, *On the machine tool substitutive model creation, supported by the finite element method*
- 247 E. WITBRODT and K.J. KALIŃSKI, *Transient vibration of unsteady linear closed loop systems*
- 269 B. MICHALAK, *Stability of slightly wrinkled plates interacting with an elastic subsoil*
- 285 W.A. TRZCIŃSKI, *Estimation of the deflection angle of plate driven by the products of grazing detonation*
- 299 K.L. VERMA and N. HASEBE, *On the propagation of generalized thermoelastic vibrations in plates*
- 321 M. PIETRZYK, *Modelling of hot metal forming in the conditions of variable strain rates and temperatures*
- 339 A. GONTARZ and Z. PATER, *Material model of the AlCu₂SiMn alloy under hot plastic forming*
- 351 W. BOCHNIAK and A. KORBEL, *Extrusion of CuZn₃₉Pb₂ alloy by the KOBO method*
- 369 G.S. MISHURIS and R.E. ŚLIWA, *Some kinematically admissible velocity fields in multimaterial extrusion*
